

ITerashima Environmental Services

(ITES) is a Honolulu-based environmental consulting firm specializing in environmental science, engineering and readiness training. ITES principal, Ms. Iris Terashima, has worked in Hawaii and the Pacific for 20+ years, and is partnered with many of the local Hawaii as well as U.S. mainland firms—providing a diverse and experienced technical staff of engineers, scientists, and planners for ITES clients.

“We get the job done”

ITES has a reputation for executing projects successfully, and ITES teams have received numerous client commendations. Our responsiveness and commitment to meeting client needs is reflected in long-term client relationships, and we continue to work with satisfied repeat customers.

“Ms. Terashima was able to undertake a very large-scale property assessment review in a very short timeframe. Her team worked well under pressure, and was able to provide high quality work products that allowed for closure prior to the project deadline. Excellent work.”

Environmental Compliance: Regulatory Oversight and Permitting

Department of Veterans Affairs Environmental Compliance Audits, 2011

Multimedia environmental audits were conducted at Department of Veterans Affairs facilities in Nevada, Utah, Denver, and Wyoming. Audit protocols encompassed federal, state, and local regulations and included conformance with Executive Orders 13514. Critical to the audits were the standardization of the audit findings to support multiple facility corrective actions.

Pollution Prevention Plans, Pacific AOR 2007 - Present

ITES compliance teams prepared pollution prevention opportunity assessments and pollution prevention plans for numerous government and private clients. The plans identified both internal and external P2 goals and pursuits and were aligned with facility sustainability metrics.

Environmental Compliance Programs, Oahu, Hawaii 2007 - Present

Large-scale environmental compliance reviews have been conducted for 247 properties on Oahu, Hawaii for numerous clients. The reviews involve evaluations of critical regulatory compliance and permitting issues and the development of Environmental Management Plans. Plans have been developed for areas encompassing over 200 acres of industrial properties. Critical environmental issues are identified, action items developed, and program costs developed in support of client requirements.

Compliance Assessments and UST Program Plans 2004 - 2008

Environmental Compliance Assessments of numerous facility operations have been conducted to assess the compliance status of management of hazardous materials, hazardous and solid waste, wastewater, pesticides, toxic substances, air emissions, and cultural and natural resource management. In addition, UST Program Plans were developed for the removal and management of over 120 USTs located throughout Oahu.

ROM cost estimates were prepared and action items prioritized.
